

The Fine Print

Genetic Testing at Delta Genomics

No Result (NR): Even though a sample may look normal, the presence of undetectable matter (ie: dust, bacteria, spores, and other foreign materials) may interfere with the generation of acceptable results.

Sample Rejected (SR): Samples may be turned away by the laboratory for reasons including, but not limited to: insufficient sample material, broken sample containers, sample contamination, excessive presence of fecal material, biological hazards, sample tampering, unlabeled sample containers, presence of foreign materials.

In-Progress (IP): Results are not yet complete.

Delta Genomics Disclaimer: This report describes the results of our analysis of the biological samples that you or someone acting on your behalf sent to Delta Genomics. Delta Genomics sanctions only that we have conducted our best efforts to identify the specific alleles in the DNA from the sample(s) provided to Delta Genomics and described herein. Delta Genomics makes no further warranty, expressed or implied. The results provided in this report are declared on the assumption that each sample provided originated from a single animal. The results provided in this report are declared in accordance with the sample identifier that was provided by you or someone acting on your behalf. Delta Genomics is not responsible for the correct identification of a particular animal as the source of a submitted sample.

Delta Genomics assumes no legal liability or responsibility for the accuracy, completeness, reliability, or usefulness of any information contained within this report, nor does Delta Genomics warrant that its use would not infringe privately owned rights. In no event shall Delta Genomics or its agents or its officers be held liable for any damages whatsoever (include, but not limited to: damages for loss of profits or business interference, or any indirect, special, punitive, consequential or incidental damages) that may occur as a result of using the information contained in this report, even in the instance where Delta Genomics has been informed of the possibility of such damages.
